

## RENU Advanced Huidverzorging

### Gezondheid is schoonheid

Praktisch iedereen is geboren met een zachte veerkrachtige huid. Je cellen leveren de 'vingerafdruk' voor je oorspronkelijke schoonheid. Een jonge huid vernieuwt zichzelf voortdurend. Naar mate de tijd verstrijkt, vertraagt de cel vernieuwing dramatisch. Het resultaat is een zichtbaar verouderende huid. Je mooie huid van vroeger hoeft niet tot het verleden te behoren.

Wij introduceren RENU Advanced, de eerste en ENIGE anti-aging gezichtsbehandeling systeem!

**Krijg je mooiste huid terug met RENU Advanced huidverzorgingsproducten.**

### Get your cells talking

Youthful cells renew much quicker than aging cells. Active cellular communication is key for renewal of healthy, beautiful skin.

### Redox is the key

Without redox signalling molecules, skin cells can't communicate. ASEA's patented redox signalling technology has been clinically proven to benefit cell communication and renewal for a healthy, youthful appearance.
